Our company is a fully-owned subsidiary of Nissin Corporation, which was established in 1938, located in Tokyo, Japan. Nissin Corporation has a net sales of 104,431 millions of Yen in year 2010.

Nissin Transportation & Warehousing (HK) Limited was established in 1974 and started its business by transporting equipment for infrastructure within Hong Kong. In the years that followed, we expanded offices, facilities and services along with the growth of Guangdong area.

Before deployment to ITIS software, the systems we used could not provide a total integrated solution, and the software could not provide accurate data. The management could not make use of any reporting for decision making. Staff had to do double entry from operation systems to accounting system, thus creating a lot of over time charges for the company.

In 1998, Nissin Hong Kong chose ITIS products to fulfill daily operations on Air Freight, Ocean Freight and Accounting. Since the deployment of ITIS products, our business has soared almost 300% in a few years. Nevertheless, the total increment of staff remains minimal.

ITIS products have provided us seamless integration from system to system, thus saving a lot of manpower. Moreover, it gives us 100% data accuracy that our management team can make correct decision based on all the real time reporting. Our company has no IT staff and ITIS customer service and support team has been providing excellent services to make sure that the systems are running 7x24 whole year through.

We have joined the ITIS user family over 14 years. Nissin Hong Kong will certainly continue this long term partnership and will have no hesitation to recommend ITIS products to Nissin group of companies.
