

Date: 28th March 2023

Fukuyama Global Solutions (HK) Limited is a subsidiary of Fukuyama Transporting Global Company Limited. Our company has been in operation since December 1992. Specializing in providing logistics solutions such as China-Hong Kong cross border trucking, international air and sea freight forwarding, third party logistics, inventory management and more.

We realized that, our outdated system was no longer able to fully meet our requirements as our business kept expanding. In order to carry out business analysis and meet the challenges of a rapidly evolving and highly competitive industry, our management needed to have faster and more reliable information at their fingertips.

We decided to partner with ITIS after evaluating a number of system solutions from other vendors. ITIS demonstrated its skills and capabilities in providing system solutions for the logistics sector. After using the ITIS solution, we have saved a considerable amount of time and effort in data entry and processing. In addition, to support successful decision making, we are now able to provide a variety of accurate and timely performance reports.

Ongoing support from ITIS in the form of additional solutions and modification services has enabled us to keep pace with evolving business regulations and requirements. Their customer support team is extremely competent, responding promptly, actively helping to resolve issues and effectively deploying patches to reduce operational impact. We value the contribution ITIS

Yours faithfully,
For and on behalf of
Fukuyama Global Solutions (HK) Limited

Ikeda Haruki
General Manager
